Expires: February 07, 2019

The Department of Rehabilitation and Movement Science, Doctor of Physical Therapy Program at the University of Vermont (UVM) invites applications for a tenure-track position at the rank of Assistant Professor to begin August 2019.

Successful candidates will be physical therapists who hold academic doctoral degrees and who have or are eligible for licensure in the state of Vermont. Candidates are expected to have an interest in collaborative teamwork, be active in research and/or have potential to develop an independent scholarship agenda while being committed to teaching, advising, and professional development of our students. Although not required, completion of a postdoctoral research fellowship is strongly recommended. Applicants with scholarly and teaching expertise in pediatrics, medical/surgical/cardiopulmonary management, leadership, pain science and rehabilitation technologies are encouraged to apply; however, all qualified candidates are welcome to submit applications for consideration. Teaching responsibilities will be dependent on content expertise.

Established in 1972, the DPT program is well recognized for its quality, research and innovative teaching and learning opportunities (www.uvm.edu/cnhs/rms/physical_therapy). The small class size of 40 students allows for a variety of teaching approaches between clinical and tenure-track faculty, as well as time for scholarly activity. The DPT program is an integral component of the Department of Rehabilitation and Movement Science in the College of Nursing and Health Sciences within the University. Uniquely positioned on the UVM main campus, along with our academic colleagues in Medicine, Health Sciences, Engineering, Nutrition and Psychology and our clinical colleagues in the Medical Center, the College provides an exciting academic environment with excellent collaborative relationship potentials for new faculty. The College priorities focus on promoting excellence in research, teaching and learning, interprofessional education, and practice collaborations within a stimulating Academic Medical Center environment.

The Department of Rehabilitation and Movement Science integrates three complementary applied human science programs with strong interdisciplinary research ties – physical therapy, exercise science, and athletic training. Departmental facilities include the recently renovated Human Motion Analysis lab which houses multiple force plates, EMG, and three-dimensional biomechanical equipment for static and dynamic human movement research; a physical activity and exercise behavior lab; and a neurophysiology lab that utilizes TMS and EEG. Other laboratory space for bench research interests is a potential through our interdisciplinary faculty collaborators.

Description: The University of Vermont combines faculty-student relationships most commonly found in a small liberal arts college with the resources of a major research institution and medical center. The University is home to 10,612 undergraduates, 1,552 graduate students, 466 medical students and 1,685 full- and part-time faculty. Located in Burlington, Vermont (perennially voted one of America's most exciting small cities), UVM's setting in a valley on the shores of Lake Champlain, between the Adirondack and the Green Mountain ranges, inspires visitors and residents alike.

Review of applications will begin November 2018 and continue until filled. The University of Vermont is an Equal Opportunity/Affirmative Action Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identify, national origin, disability, protected veteran status, or any other category legally protected by federal or state law. The University encourages applications from all individuals who will contribute to the diversity and excellence of the institution.

The University is especially interested in candidates who can contribute to the diversity and excellence of the academic community through their research, teaching, and/or service. Applicants are requested to include in their cover letter information about how they will further this goal.

TO APPLY

Applications requires a: 1) letter of interest, 2) curriculum vita, 3) contact information for three professional references. Apply at the following link:

<https://www.uvmjobs.com> (search for the position using the department name "Rehabilitation & Movement Science")
